

# CAMOBOTS

Dear Sir or Madam,

I am writing to you on behalf of Camo-Bots. The club is in its thirteenth year of competing in the FIRST (For Inspiration and Recognition of Science & Technology) Robotics League, a national robotics competition. We are writing to you to ask if you would be willing to sponsor our team as we prepare for the 2023-2024 competition season and our trip to worlds in Houston, Texas.

Our FIRST team is made up of students from all backgrounds at Western Wayne and Honesdale High Schools. Every year we design, build, and program large self-propelled robots that compete against other robots built by FIRST teams from across the states. Working in FIRST gives the students valuable hands-on training in technology and teamwork skills that are directly applicable to the workplace: project development, mechanical design & engineering, as well as enterprising skills such as fundraising, budgeting, writing, and graphic design. Students' work in FIRST can also give them an advantage in applying to colleges, because their technical programs favor applicants who have had experience in competitive robotics. Even more, there are millions of dollars in college scholarships available to students who participate in FIRST robotics.

There are many expenses connected with running the club and competing. The costs of the parts & equipment to build our robots, competition entry fees, and transportation to competitions significantly add up. To date, the robotics club relies solely on fundraising and sponsorships to cover these expenses.

Attached is a form with levels of sponsorship explained in detail. If you are interested in donating, please complete the form and remit with payment. In addition to financial donations, Camo-Bots welcomes donations of goods and services. Please note, this is a tax-deductible donation.

We thank you for your consideration and would be most grateful for any donation that you can offer.

Best Regards,

Camo-Bots - Team 4285
